

LIGHT DUTY MULTI-ROLLER POWERBOAT & RIB TRAILERS

RANGE INFORMATION

Possible Multi-Roller trailer combinations are: Lengths from 3.8-5.2m/13-17' with a single un-braked axle from 500-750kg. Lengths from 5.2-6.1m/17-20' with a single braked axle from 1000-1200kg. Lengths from 5.2-6.7m/17-22' with twin braked axles at 2000 and 2600kg. Trailers are priced according to Gross Vehicle Weight (GVW) and so offer the exact trailer specification at the best price. Our Multi-Roller trailers have, on average, 25% more rollers than competitive models on the market. As a result, they spread the weight of the craft over a greater area and protect the hull. Our wobble rollers' tapered bore and two-piece construction offer strength, durability and excellent support and they micro-adjust to the hull for a perfect fit. All of our products are fully galvanised to ISO1461 (1999).

CONTACTING US

Please ensure that you can supply the weight, length and hull type of your boat when contacting us. This will help us to quickly specify the most suitable product for your needs or answer any questions you may have.

Specifications and prices for selected spares and accessories are listed overleaf.

All prices are correct at September 2006.

TRAILER SERVICING

As with all vehicles, it is important that trailers are serviced regularly and kept in a roadworthy condition. Snipe trailers are supplied with a service manual and record and we advise that it is kept updated. Please ensure that only Snipe replacement parts are used for servicing. Failure to do so may invalidate the warranty. If in doubt, contact Snipe or Gordon Love Trailers.
